<sup>1</sup> NUPLAZID (pimavanserin) is only approved in the U.S. by the FDA for the treatment of hallucinations and delusions associated with Parkinson's disease psychosis.

<sup>2</sup> Acadia has an exclusive license to develop and commercialize trofinetide worldwide from Neuren Pharmaceuticals. DAYBUE (trofinetide) is only approved in the U.S. by the FDA for the treatment of Rett syndrome in adults and pediatric patients two years of age and older.

<sup>3</sup> Acadia acquired Levo Therapeutics and its rights/licenses to ACP-101.

<sup>4</sup> ACP-101, ACP-204 and ACP-2591 are investigational agents, and the safety and efficacy of these agents have not been established. There is no guarantee these investigational agents will be filed with or approved by any regulatory agency.

<sup>5</sup> Acadia entered into a collaboration with Stoke Therapeutics to discover, develop and commercialize novel RNA-based medicines for the potential treatment of severe and rare genetic neurodevelopmental diseases; ASO = Antisense oligonucleotide. Updated March 11, 2024; Acadia disclaims any duty to update.
